

KOFAX Capture Configuration Guide Version 8

Client System Requirements This section lists the requirements for installing Kofax Capture on a client workstation (as part of a client/server installation).

Minimum Hardware Requirements

The following lists the minimum hardware requirements for the Kofax Capture client system:

- Processor: Pentium 4 class processor, or equivalent
- System memory: 512 Mbytes of memory or more
- Disk space: 680 Mbytes on any local drive, plus 300 Mbytes available on your local C drive or wherever your operating system is installed, for installation files, temporary files, and working space during processing
- Display: 1024 x 768 display with 16-bit color, small fonts
- USB Port: RecoStar Professional hardware key (optional)
- Printer: 600 DPI to support the Separator Sheet Utility (optional)
- NIC: 100 Mbps

Recommended Hardware Requirements

The following lists the recommended hardware requirements for the Kofax Capture client system:

- Processor: Pentium 4 class processor
- System memory: 1 Gbyte of memory or more
- Disk space: 680 Mbytes on any local drive, plus 300 Mbytes available on your local C drive or wherever your operating system is installed, for installation files, temporary files, and working space during processing
- Display: 1024 x 768 with 24 bit color, small fonts; 24 bit color is recommended for best viewing of online help
- USB Port: RecoStar Professional hardware key (optional)
- Printer: 600 DPI to support the Separator Sheet Utility (optional)
- NIC: 100 Mbps

Certified Operating Systems

The following operating systems have been certified for the Kofax Capture client system:

- Windows 2000 Server with Service Pack 4
- Windows XP Professional with Service Pack 2
- Windows Server 2003 Enterprise Edition with Service Pack 2
- Windows Server 2003 Enterprise Edition R2 with Service Pack 2
- Windows Server 2003 Enterprise x64 Edition (64-Bit) R2 with Service Pack 2
- Windows Vista Business Edition
- Windows Vista Enterprise Edition
- Windows Vista Enterprise x64 (64-Bit) Edition

Scanner Support

Böwe Bell+Howell, Canon, Fujitsu, HP, Kodak, Panasonic, Ricoh and Visioneer
Visit www.kofax.com for a complete listing of supported scanner models.

Image Format Support

- | <i>Import:</i> | <i>Export:</i> |
|--|-------------------------------|
| • TIFF (Group 3 and 4, Single and Multipage) | • TIFF (Single and Multipage) |
| • BMP | • PDF |
| • PCX | • PCX |
| • JPG | • JPG |
| • CALS | |
| • PDF | |

Non-Image Format Support

Microsoft Office and all other standard file formats can be imported, viewed, indexed and released.

KOFAX Capture Configuration Guide Version 8

Standalone System Requirements (continued) This section lists the requirements for installing Kofax Capture on a standalone workstation.

Certified Operating Systems

The following operating systems have been certified for Kofax Capture standalone workstations:

- Windows 2000 Server with Service Pack 4
- Windows XP Professional with Service Pack 2
- Windows Server 2003 Enterprise Edition with Service Pack 2
- Windows Server 2003 Enterprise Edition R2 with Service Pack 2
- Windows Server 2003 Enterprise x64 Edition (64-Bit) R2 with Service Pack 2
- Windows Vista Business Edition
- Windows Vista Enterprise Edition
- Windows Vista Enterprise x64 (64-Bit) Edition

Server System Requirements This section lists the requirements for installing Kofax Capture on a server station.
Note It is recommended that you use a dedicated server for Kofax Capture.

Minimum Hardware Requirements

The following lists the minimum hardware requirements for the Kofax Capture server:

- Processor: Pentium 4 class processor, or equivalent
- System memory: 1 Gbyte or more
- Disk space: 1.3 Gbytes on any local drive, plus 300 Mbytes available on your local C drive or wherever your operating system is installed, for installation files, temporary files, and working space during processing. You may need even more disk space, if you have many image files or a large database.
- Display: 1024 x 768 display with 16-bit color, small fonts; 24 bit color is recommended for the best viewing of online help
- USB Port: Kofax Capture hardware key
- NIC: 100 Mbps

Certified Operating Systems

Kofax has certified the following operating systems for the server files and software:

- Windows 2000 Server with Service Pack 4
- Windows Server 2003 Enterprise Edition with Service Pack 2
- Windows Server 2003 Enterprise Edition R2 with Service Pack 2
- Windows Server 2003 Enterprise x64 Edition (64-Bit) R2 with Service Pack 2

In general, the Kofax Capture server files and software should be installed on the same machine. However, some existing sites may have legacy issues that require server files to be kept on a machine that is not running either of the Kofax Capture certified operating systems listed above. See Installation Guide, File Locations, for more information on Kofax Capture server files and server software. See Installation Guide, Appendix C — Setting Up Distributed Server Configurations for more information on installing Kofax Capture server files on a machine that is not running an operating system certified for use with Kofax Capture.
